IRON KING KONG ON YOUR T-SHIRT

King Kong, the greatest movie monster of them all, lives again in a brand-new film based on the 1933 classic—and every kid in town knows it! Wouldn't it be fun to celebrate this favorite movie thriller with the most famous scene of all emblazoned on your chest! In this updated version, a \$24-million Paramount release by Dino De Laurentiis, the final scene is atop New York's World Trade Center, and the monster himself seems more real than ever. This King Kong is a mechanical gorilla 40 feet tall, weighing 6½ tons, with thousands of feet of wiring in him by which he rages through his terrifying exploits. He even closes his fingers gently around Dwan, the object of his love. Directions for ironing the transfer (*opposite*) onto your T-shirt are on page 126.
